TASK

1. Write in the name of the part of the plant.
 2. Draw a line to join the name to that part of the plant.
- Choose your words from this list:

Root

Leaf

Flower

Stem

Plant part

Job it does

reproduction takes place

this is where the plant makes its own food

water moves up the plant from the roots

holds the plant in the ground and takes in water

- » Draw another line to join the part of the plant to the job it does.

Robin Hill's Plants

1. Look carefully at some different plants at the park.
2. Draw the parts of one flowering plant into the boxes below.
3. Make sure you include all of the detail.
4. Try to find out the name of the plant. There may be a label close by.

flower

Name of plant:

leaf

Name of plant:

Look carefully at the leaves on the trees.

105052

- ▶ Evergreen trees have thin leaves, called needles.
- ▶ This stops them being damaged by the winter winds.

Evergreen leaf

Deciduous leaf

Plants that grow in bright sunlight often have smaller leaves.

www.edudest.uk

Plants that grow in shade often have larger leaves.

Choose a plant. Look at the leaves.

1. Draw a leaf.
2. Label your drawing to say if the plant was growing in strong sunlight or in the shade.
